

WF-LM10 MINI-JACK CARDIOID LAVALIER MICROPHONE WITH ELECTRET CAPSULE (TS MINI-JACK CONNECTOR WITH THREAD)

This microphone is specifically designed for conferences, presentations, live events and in general in combination with wireless systems whose transmitter is bodypack type. The Electret capsule with Cardioid polar pattern allows a good voice pickup and avoids the Larsen effect, which is very frequent in these applications. The good sensitivity and the excellent frequency response make the voice natural (no nasal sound) without increasing a lot the preamplifier gain.

The microphone is equipped with a windscreen foam, unobtrusive clip and 1/8" TS mini-jack connector with safety threading. It is designed for combination with Soundsation WF-U2600HP, WF-U2300HP, WF-U2300PP, WF-U1300P, WF-U216HP, WF-U216PP bodypacks and, in general, with all those pocket transmitters with 1/8" TS (mono) mini-jack with security thread.

PRODUCT DETAILS

KEY FEATURES

Specifically designed for conferences, presentations and live events

Compatible with Soundsation WF-U2600HP, WF-U2300HP, WF-U2300PP, WF-U1300P, WF-U216HP, WF-U216PP bodypacks

1/8" (3.5mm) TS Screw-lock Jack connector for wireless bodypacks

Electret Capsule with Cardioid polar pattern

Foam windscreen

Unobtrusive small clip for attaching to clothing

Compact, discreet design

SPECIFICATIONS

Impedance	680 Ω \pm 10%
Sensitivity	-37dB \pm 2dB
Frequency Response	20Hz - 20kHz
Directivity	Uni-directional Cardioid
Working Voltage	From 1.0V to 10V
Connector	1/8" (3.5mm) TS Screw-lock jack
Wire Rod	ϕ =2.3mm / L=1.2m
