## MTR-25-10W-SET

SET OF 4X SLIM 25X10W RGBW BLINDERS WITH FLIGHT CASE

Sounsation MTR-25-10W-4IN1 RGBW combines 4IN1 LED technology and modular mechanical design to provide a powerful matrix system and create graphic Pixel-Art effects, to be used as blinders and much more. The set consists of 4 units and a flight case with wheels. The enclosure of each module is equipped with robust and reliable fastening system that allows you to create real LED-walls. The Master/Slave DMX control system allows a maximum of 1, 4 or 16 modules controllable without any software. You just need a DMX controller with an adequate number of channels (see the manual for details). But if you add a PC/DMX interface (not supplied), the potential become enormous, and the limit is established only by the characteristics of the interface and the software used (not supplied). About software, the SOUNDSATION MTR-25-10W-RGBW is compatible with all major packages on the market, such as Emulation Pro Control Software ® by Elation, DMX Eclipse ™ Software by Blizzard Lighting, Sunlite Suite 2 ™ by Nicolaudie, Madrix 3 by Madrix®, and many others.
