

FV100-LM GUITAR VOLUME PEDAL

CONTROL series pedal has been conceived to perform precise control and comfortable use due to their slip proof large footboard.

Soundsation FV100-LM has been designed not only for guitar players but also for keyboards and other electronic instrument users, and it's useful to control volume or gain, depending on the connection through the effect chain and other equipment. A must-have to enrich your expression possibilities and control over your sound.
