"True Diversity" means that the receiving system is equipped with two antennas, two receiving circuits and a device capable of continuously choose the stronger and interference-free signal.

The WF-U2602 is built with leading technology that allows the integration of many of the major functions - such as amplification section, digital signal processing, **PLL (Phase-Locked Loop)** frequency synthesis, and more - into a few CHiPs. This allows us to offer highly professional performance yet cost-effective products.

The WF-U2602 is also equipped with the automatic frequency search system and IR sync system for channel synchronization between receiver and transmitter in a quick way. Furthermore, the **Digital Pilot Technology** not only allows to monitor reception level and battery charge, but even to operate up to 200 sets multiple systems without problems.

The handheld transmitters feature a professional cardioid capsule with a warm sound and rich detail in the high frequency range. The **capsule is easily removable**, and the transmitter body is equipped with a connection system compatible with capsules from many microphone manufacturers, giving demanding professionals the option to keep their sound.

Finally, the receiver comes with a kit for mounting in 1 standard 19" rack unit. The kit is composed by two L-shape adapters and four screws to mount them on both receiver sides.
